Architecture

The architecture shooting of both internal and external requires a careful approach in its analysis of the various parameters of these volumes to get their fullness. The choice of shooting material is influenced by the subject and the desired result.

We favored always the aesthetic side of the subject and enhancing the functionality of its character.

For this, we use all the possibilities we offer both digital and analogue photography and the equipment, which are a fixed camera type Mamyia RZ to Sinar Technical camera sizes up to 8x10

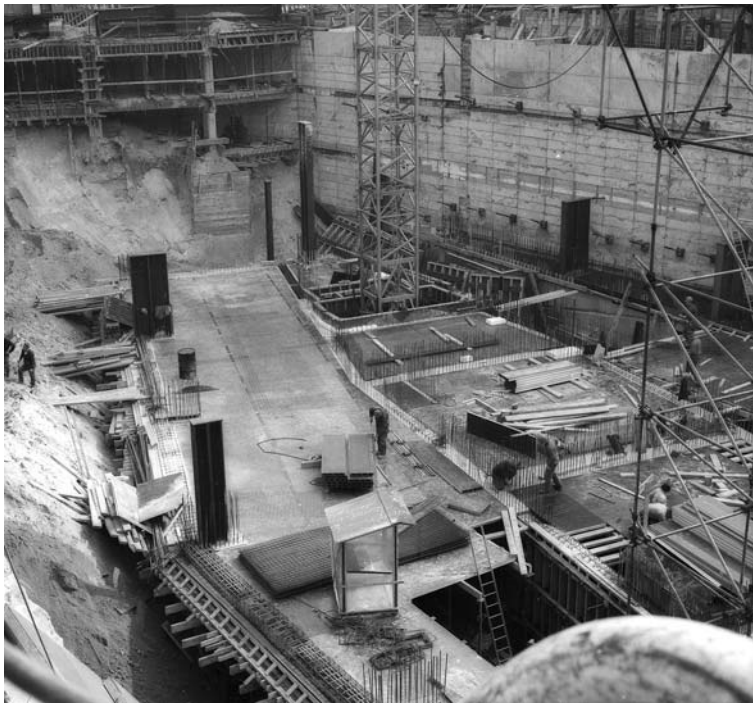

Tour Astro

Monitoring construction

The construction of the tower Madou and Astro in the 70s helped change the vision of a district of Brussels, due to the will of Mr. Cuddel mayor of the commune of Saint-Josse-Ten-Noode, that with his vision of the city, allowed for the creation of his will to a large part of the Park Tower in Brussels

S.N.C.B-U.E

The creation of a new stretch of railway for increase traffic at the station Schumann, allowed us to realizare this unusual and fleeting image of a building EU to cross a bridge to the present day closed.
